The higher trend of values in Novem- per capita a day, making the actual ber has been duplicated in the first cost of living at Ruskin from 7 to 9. week of December, and cereals, long cents a day for each man, woman and backward in this respect, have led the child.

The community dining-room is large room, 25 feet wide and 150 feet A better report comes from the flour long, where we see nearly 300 men, illing industry, but the demad is women and children seated at long tables. Breakfast is our first meal.

Dinner generally varies, according to
the season. The bill of fare usually consists of rice or peas, beens or macato attract crowds on the streets by runi, some two or more of these; Geor- words, gestures or otherwise. A blow gia sirup, beets, tomatoes, egg plants, at the Salvation Army, itinerant potatoes, some, bread and cereal coffee preacher, peddlers, etc. Better go—cereal coffee is manufactured by the companion of the companio colonists and is one of their main in "ON-T GET FOOTSORE, GET FOOT-

Chisese Undergo Examinations While in Their Closed Cells.

The University of London a few years ago admitted to its initial examluations about 1,400 students and passone-half. There are four different examinations in the Chinese university must stand. The first is for the degree of "Budding Genius," corresponding to our B. A. The examination is held in every prefecture. The second is for the degree of "Promoted Scholar," or M. A., and is held in each provincial capital. Li-Hong-Chang has never advanced beyoud this degree. The third is for "Fit or Office," a sort of D. C. L. or LL. D. The fourth is for admission to the Han-lin academy, or "Forest of Pencils," which makes the successful scholar surprise the state. one of the great men of the empire. Each degree is open only to the men who have won the lower degrees. The lowest is open to anyone. "A man of steers, price 7 c; cows, 7c; mutton talent," as Dr. Martin says, "may

ination hall. It consists of long rows of cells open at the end and just large Wheat-Walla Walls, 54@541/4c; enough to hold a scholar with his bed-Valley, nominal; Bluestem, 56 %c per ding, teapot and food. There are 12,000 cells in the Canton hall. A great wall surrounds the grounds, and at the end is the hall where the officials sit. The candidates are all admitted at the same time, assigned to their cells and the gates are scaled. If a student dies, as often happens, his body is put through a small hole in the wall. Each examination lasts twenty-four hours. Then the students are released for two days, only to return for two more sleges. paper with blots or defacements is thrown out. Such innocent questions as this are proposed to them: "The art of war arose under Hwang-Ti forty-four hundred years ago. Different dynastles have since that time adopted different regulations in regard to the use of militia or standing armies, the mode of raising supplies for the army, etc. Can you state these briefly?" The men who pass these examinations are a lot of pedants, arid as the deserts and primeval as the patriarchs.-Leslie's Monthly.

His Banjo a Barometer.

of weather. No matter if he attends Tonio a function when the night is cloudless printed on every bottle showing that it and rain falls before he goes home, he is simply Iron and Quinine in a taste-Eastern Oregon, 10@12e; mohair, 25 is always on hand with an umbrella, much to the delight of the girl with him.

For a long time his secret remained undisclosed, and he was looked upon as a weather prophet who could give at war with equity. points to the local bureau. However, It is no longer a secret, for the young man confessed not long ago the reason for his invariably correct prognostication of nasty weather. He is a very fair banjoist, and it was noticed that he always played on his instrument before going out at night. When the plaintive sounds were muffled, he never neglected to take his umbrells, but if, on the contrary, the sound was sharp and clear he went without it.

Hops—Crop. 1900, 13½ @17c.

The head, or sounding board, of a Entter—Fancy creamery 26 @ 26½ c; banjo is made of sheepskin, and in seconds, 25c; fancy dairy, 22@ damp weather it expands, and the head comes tight as a drum. This is the reason for his invariable good luck in "picking" the weather, for he owns a natural barometer.

Travels of a Blood Corpuscie. The mileage of the blood circulation Richard Lester, a young man who out \$9.00@12.50; best barley \$9.50 reveals some astonishing facts in our has been working in a Coos county log- alfalfa, \$7.00@10.00 per ton: straw, personal history. Thus it has been calculated that, assuming the heart to beat sixty-nine times a minute at ordinary Salinas Burbanks, 900@\$1.15; river heart pressure, the blood goes at the Burbanks, 30@75c; sweets, 50@80c, rate of 207 yards in the minute, or seven miles per hour, 168 miles per day and 61,320 miles per year. If a man of 84 years of age could have one single blood corpuscle floating in his blood all his life it would have traveled in that same time 5,150,880 miles.
